

Water Meter Programs

If you have an automatic lawn sprinkler, or otherwise use a large amount of water that does not enter the sewer, you may install a submeter to measure that water use, and you will not be charged for it on your sewer bill. If you have a well, sewer charges are based on a count of plumbing fixtures in your home, and not on the amount of water you use. You have the option to install a meter at your pump tank, and that quantity will be used to calculate your sewer charge instead of fixtures. For more information, please call the Wastewater Utilities Department at 215-886-0934.
